

Tips for Protecting the Quality Products in Windshields

Provided by PPG

- 1) Do not slam the door with all windows closed.
- 2) Do not put your car through an automatic car wash for 24 hours.
- 3) Replace the present windshield wipers if they show signs of wear.
- 4) Avoid abrasive cleaners.
- 5) Avoid the use of glass cleaners that contain ammonia or alcohol for the first 48 hours following installation.
- 6) Special tape may have been used to secure your windshield moldings while the adhesive cures. Remove this tape 24 hours after installation.
- 7) Limit your driving for the first 24 hours.
